*Registration closes on  
Monday, December 11th*

Valentine Coffee Co. was founded on the premise that coffee begins as a fruit, uniquely evocative of a particular time and place. This character – the terroir – is maximized by carefully roasting beans to the apex of natural sweetness, brightness, and balance... never to bitterness.

We start with the best beans available and a passion for everything delicious. We rely on curiosity, experience, and attention to detail to craft the most expressive – yet satisfying – coffee possible. In this pursuit, we never fail to enjoy ourselves, our work, or our coffee!

Valentine Coffee is specialty coffee roasted in small batches by people who care. The “specialty” part means we only choose to roast top-tier, rigorously-graded, traceable coffees. Small batches ensure our full attention to each and every roast, and we take care to respect the effort of every person involved in bringing us these coffees from their far-flung farms.

Extracting each of our coffee’s innate flavors is what our brew bar is about. The water is always 209 degrees, each cultivar has a specific grind and each cup is measured to the gram, ensuring everything we can control is in perfect balance. Every cup is hand poured so you can experience Valentine coffee at its very best, Taste art and science collide in the perfect cup of coffee.
